

Environmentally Responsible Disposal of Saturated Carbon Filters

Available by Annual Contract or Bundled with Replacement Filter Costs

SECUR.TM
safe disposal service

Air Science® Technologies, an industry-leading international supplier of fume filtration products to the medical, industrial forensic and educational sectors, is a certified waste carrier in accordance with the 2011 Waste Regulations of England and Wales. Through this certification, Air Science Technologies offer Secur™ Safe Disposal Service, a one source replacement and disposal option for saturated activated carbon filters.

REMOVE

➤ Remove expended filter and document.

INSTALL

➤ Install new filter.

DISPOSE

➤ Dispose of spent filter or hold for disposition.

RECYCLE

➤ Recycle filter by professionals, if possible.

BENEFITS

- Our Secur Safe Disposal Service permits disposal of saturated filters responsibly during your annual service visit, if required.
- Used filters are properly treated at a UK treatment facility which specializes in secure destruction and recycling.
- This environmentally responsible waste removal solution leads to incineration of saturated carbon filters, transforming them into a positive energy source that can replace fossil fuels.
- Secur Safe Disposal may be ordered as a separate line item to your annual service or included in the cost of your Filtco replacement filters.

COMPREHENSIVE SERVICE FOR FILTRATION EQUIPMENT

Our international reach allows us to support you during the purchasing process and ensure your equipment maintains performance reliability for years to come. Our staff has over 50 years of combined experience in the industry. We confirm that all Air Science Technologies products are installed in accordance with product specifications and that all Filtco Filters are appropriate for the intended application.

- Air Science Technologies provides maintenance services for all product lines. Our expert technicians provide basic maintenance services to routinely check alarms, sashes, ports, fans and other system components.
- Regular preventive maintenance of your equipment is essential for the continued safety of your personnel and your work.
- Routine maintenance and testing services help prevent unplanned downtime.

forensicClean.™

PRE AND POST EVIDENCE CHAMBER CLEANING

ForensicClean™ services provide safe cleaning and preparation of evidence drying, storage and processing cabinets where biohazards may exist and where DNA must be removed and safeguarded from cross contamination. A certificate documenting the process is provided with details of the engineer who performed the service and the serial number of the chamber cleaned.

- Our commitment to superior services is exemplified by our 95% client retention ratio and our international client base, as we have collectively worked for many organizations in over 40 countries worldwide. ForensicClean services are available for all brands of forensic cabinets.
- A professionally equipped and trained team of experienced Air Science Technologies engineers is available for emergency callouts and short or long term maintenance contracts, delivering competitive pricing with minimal downtime.
- Decontamination and cleaning services in advance of cabinet decommissioning are also available.

FILTER SERVICE AND MAINTENANCE PROGRAM

Our Filter Service and Maintenance (FS&M) program is designed for turnkey supervision of filter management and includes our lowest price filter guarantee. The program delivers confirmation of compliance with filter application, installation and filter replacement reminders at specified intervals to assure safe operation with minimal downtime.

- As an industry leader in filtration, Air Science Technologies supplies expert assistance through the life of your product, from specification to installation, inspection to maintenance.
- Through Filtco Filters, we offer a full range of quality HEPA and carbon replacement filters for all makes of fume cupboards and safety cabinets, providing filters with more than 14 formulas that can effectively protect operators from a variety of organic and inorganic chemicals.
- At specified intervals, we will contact your personnel to assure conformance to application and maintenance requirements for the equipment. We will guide you through filter saturation tests and replacement procedures, providing annual filter change reminders, ensuring safe unit operation.

PERFORMANCE CERTIFICATE

Each process is documented, archived and confirmed by a Certificate of Forensic Cleaning.

FILTCO FILTERS

Filtco Filters offer the best selection and pricing for replacement filters for ductless fume cupboards and other equipment utilizing carbon filters. Filtco products meet the original equipment manufacturer specifications.
